

CLDE-464: CDCA Review

This course is designed to help prepare the D-4 Dental Student to take the (ADEX) American Dental Examination administered by The Commission on Dental Competency Assessments. After reading the complete manual provided by CDCA Faculty members that participate in the administration of the examination will present lectures based on the stated criteria for successfully passing the examination. The information given will also be based on their personal experiences and observations of candidates during the examination. Each session will have time available for questions related to the manual.

Credits: 0

Program: Clinical Dentistry
