

# CLPS-320: Professional Practice Readiness II

This course is designed to assess the skills of 3rd-year pharmacy students using an active learning format. All five steps of the Pharmacist's Patient Care Process (PPCP) will be covered, and students must demonstrate, through fulfillment of the ACPE-derived core competencies, mastery of the pre-APPE domains. As an addendum to the course, students are expected to complete structured patient care activities (MTM) at designated sites that will enhance knowledge and skills in care delivery. Students will also be required to complete at least 1 encounter related to inter-professional education (IPE).

**Credits:** 3

**Program:** Clinical & Pharmacy Science
