

OCCG-520: Pediatrics in OT

This course introduces the role and function of occupational therapy with pediatric populations and settings, including infancy, early childhood, middle childhood, adolescence, and young adulthood. This course introduces the student to physiological, cognitive, and psychosocial function commonly referred to pediatric occupational therapy practice. Evidence-based evaluation and screening, and intervention planning for dysfunction and health promotion are emphasized throughout the occupational therapy process and within the scope of practice for the occupational therapy assistant. The significance of utilizing a family-centered approach in the intervention of pediatric populations is emphasized.

Credits: 3

Program: Occupational Therapy (Grad)
