

PHSC-321: Applications for Pharmacy Practice

The course will be co-coordinated by clinical and basic science faculty, who will provide instruction utilizing both didactic and practical teaching modalities. The applications for pharmacy practice I course is the first in a longitudinal series of courses meant to fully integrate knowledge and skills acquired from each course running during the same semester. It aims to incorporate the entrustable professional activities (EPAs), which emphasize practical applications for being a clinical pharmacist, using interactive and case-based learning activities during scheduled 3-hour sessions. Students will learn the purpose of the material taught in each course as well as how that material may be applied in practice-based real-world scenarios.
