

SWDS-317: Intervention Strategies with Selected Clinical Problems

(Advanced course, Practice Methods IV) Integrates and expands knowledge, values and skills taught in previous courses. Emphasis is place on increasing knowledge and skills in making differential diagnoses for select clinical syndromes and selecting empirically-base, culturally appropriate treatment interventions and strategies. Develops understanding of neurotransmitters related to select clinical syndromes and knowledge of psychopharmacological medications for the treatment of clinical syndromes. Emphasis is placed on the identification and treatment of loss and grief issues that are most prevalent in fields of practice in urban settings and their relevance for diverse consumer populations.
