

LAW-706: General Externship

This seminar is devised to complement your externships. Because students have chosen a wide variety of placements, a key objective of this class will be to explore topics within the public interest community from policies and practice to the treatment of the poor. You will be graded on a Pass/Fail basis. Students who successfully complete the seminar and externship placement will receive either 3 or 4 credit hours depending upon the number of hours per week they work at their placement.

Credits: 3
